### Full Environmental Assessment Form

Part 1 - Project and Setting

### Full Environmental Assessment Form Part 1 - Project and Setting

#### Instructions for Completing Part 1

Part 1 is to be completed by the applicant or project sponsor. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification.

Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies which would be necessary to update or fully develop that information.

Applicants/sponsors must complete all items in Sections A & B. In Sections C, D & E, most items contain an initial question that must be answered either "Yes" or "No". If the answer to the initial question is "Yes", complete the sub-questions that follow. If the answer to the initial question is "No", proceed to the next question. Section F allows the project sponsor to identify and attach any additional information. Section G requires the name and signature of the applicant or project sponsor to verify that the information contained in Part 1 is accurate and complete.

#### A. Project and Applicant/Sponsor Information.

Name of Action or Project:

WWTP Outfall Diffuser and Plant Improvements Project

Project Location (describe, and attach a general location map):

Outfall location: Adjacent to Ferry Road and the Ferry Road Pier, Piermont, NY; WWTP Location: 4 Route 340, Orangeburg, NY (see attached map)

Brief Description of Proposed Action (include purpose or need):

The Rockland County Sewer District No. 1 (RCSD No. 1; "Applicant") owns and operates a New York State Department of Environmental Conservation (NYSDEC) permitted municipal wastewater treatment plant (WWTP) located on NYS Route 340 in Orangeburg, Rockland County, New York. Treated effluent from the RCSD No. 1 WWTP is discharged through an existing outfall (that is jointly used by the Town of Orangetown's WWTP) into the Hudson River located in the Village of Piermont, New York. The Applicant continually monitors and evaluates the existing wastewater discharge system and proposes to undertake a variety of improvements in order to meet any final requirements that may be included in its NYSDEC State Pollutant Discharge Elimination System (SPDES) permit. It is anticipated that proposed improvement projects may include upgrade to the existing outfall and improvements at the existing WWTP. The existing outfall is located in the bed of the Hudson River south of Ferry Road and Piermont Pier. It is anticipated that the proposed work would include a pipe extension of the outfall towards the river channel, and the addition of several diffusers to increase dilution of the plant effluent discharge into the Hudson River. Improvements at the existing WWTP may include equipment upgrades and replacements, as well as treatment process improvements within the existing footprint of the WWTP and ancillary facilities.

### **Full Environmental Assessment Form**

Part 2 - Identification of Potential Project Impacts

#### Agency Use Only [If applicable]

Project :

Date :

### Full Environmental Assessment Form Part 2 - Identification of Potential Project Impacts

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency and the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

#### **Tips for completing Part 2:**

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2. •
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section. •
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact. •
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis. •
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts. •
- Answer the question in a reasonable manner considering the scale and context of the project.

| <ol> <li>Impact on Land<br/>Proposed action may involve construction on, or physical alteration of,<br/>the land surface of the proposed site. (See Part 1. D.1)<br/>If "Yes", answer questions a - j. If "No", move on to Section 2.</li> </ol> | □NO VES                           |  | YES   |
|--|-----------------------------------|--|---|
|  | Relevant<br>Part I<br>Question(s) | No, or<br>small<br>impact<br>may occur | Moderate<br>to large<br>impact may<br>occur |
| a. The proposed action may involve construction on land where depth to water table is less than 3 feet.  | E2d                               |  |   |
| b. The proposed action may involve construction on slopes of 15% or greater.   | E2f                               |  |   |
| c. The proposed action may involve construction on land where bedrock is exposed, or generally within 5 feet of existing ground surface.   | E2a                               |  |   |
| d. The proposed action may involve the excavation and removal of more than 1,000 tons of natural material.   | D2a                               |  |   |
| e. The proposed action may involve construction that continues for more than one year or in multiple phases.   | Dle                               |  |   |
| f. The proposed action may result in increased erosion, whether from physical disturbance or vegetation removal (including from treatment by herbicides).  | D2e, D2q                          |  |   |
| g. The proposed action is, or may be, located within a Coastal Erosion hazard area.  | Bli                               |  |   |
| h. Other impacts:  |                                   |  |   |

| <ul> <li>Impact on Geological Features         The proposed action may result in the modification or destruction of, or inhib access to, any unique or unusual land forms on the site (e.g., cliffs, dunes, minerals, fossils, caves). (See Part 1. E.2.g)     </li> <li>If "Yes", answer questions a - c. If "No", move on to Section 3.</li> </ul> | it<br><b>Z</b> NC                 |  | YES   |
|--|-----------------------------------|--|---|
|  | Relevant<br>Part I<br>Question(s) | No, or<br>small<br>impact<br>may occur | Moderate<br>to large<br>impact may<br>occur |
| a. Identify the specific land form(s) attached:  | E2g                               |  |   |
| <ul> <li>b. The proposed action may affect or is adjacent to a geological feature listed as a registered National Natural Landmark.</li> <li>Specific feature:</li></ul>   | E3c                               |  |   |
| c. Other impacts:  |                                   |  |   |
|  |                                   |  |   |
| <b>3.</b> Impacts on Surface Water<br>The proposed action may affect one or more wetlands or other surface water<br>bodies (e.g., streams, rivers, ponds or lakes). (See Part 1. D.2, E.2.h)<br><i>If "Yes", answer questions a - l. If "No", move on to Section 4.</i>  |                                   |  | YES   |
|  | Relevant<br>Part I<br>Question(s) | No, or<br>small<br>impact<br>may occur | Moderate<br>to large<br>impact may<br>occur |
| a. The proposed action may create a new water body.  | D2b, D1h                          |  |   |
| b. The proposed action may result in an increase or decrease of over 10% or more than a 10 acre increase or decrease in the surface area of any body of water.   | D2b                               |  |   |
| c. The proposed action may involve dredging more than 100 cubic yards of material from a wetland or water body.  | D2a                               |  |   |
| d. The proposed action may involve construction within or adjoining a freshwater or tidal wetland, or in the bed or banks of any other water body.   | E2h                               |  |   |
| e. The proposed action may create turbidity in a waterbody, either from upland erosion, runoff or by disturbing bottom sediments.  | D2a, D2h                          |  |   |
| f. The proposed action may include construction of one or more intake(s) for withdrawal of water from surface water.   | D2c                               |  |   |
| g. The proposed action may include construction of one or more outfall(s) for discharge of wastewater to surface water(s).   | D2d                               |  |   |
| h. The proposed action may cause soil erosion, or otherwise create a source of stormwater discharge that may lead to siltation or other degradation of receiving water bodies.   | D2e                               |  |   |
| i. The proposed action may affect the water quality of any water bodies within or downstream of the site of the proposed action.   | E2h                               |  |   |
| j. The proposed action may involve the application of pesticides or herbicides in or around any water body.  | D2q, E2h                          |  |   |
| k. The proposed action may require the construction of new, or expansion of existing, wastewater treatment facilities.   | D1a, D2d                          |  |   |

| <ul> <li>4. Impact on groundwater The proposed action may result in new or additional use of ground water, or may have the potential to introduce contaminants to ground water or an aquifu (See Part 1. D.2.a, D.2.c, D.2.d, D.2.p, D.2.q, D.2.t) If "Yes", answer questions a - h. If "No", move on to Section 5.</li></ul> | er.                               |  | YES   |
|---|-----------------------------------|--|---|
|   | Relevant<br>Part I<br>Question(s) | No, or<br>small<br>impact<br>may occur | Moderate<br>to large<br>impact may<br>occur |
| a. The proposed action may require new water supply wells, or create additional demand<br>on supplies from existing water supply wells.   | D2c                               |  |   |
| b. Water supply demand from the proposed action may exceed safe and sustainable withdrawal capacity rate of the local supply or aquifer.<br>Cite Source:  | D2c                               |  |   |
| c. The proposed action may allow or result in residential uses in areas without water and sewer services.   | D1a, D2c                          |  |   |
| d. The proposed action may include or require wastewater discharged to groundwater.   | D2d, E21                          |  |   |
| e. The proposed action may result in the construction of water supply wells in locations where groundwater is, or is suspected to be, contaminated.   | D2c, E1f,<br>E1g, E1h             |  |   |
| f. The proposed action may require the bulk storage of petroleum or chemical products over ground water or an aquifer.  | D2p, E21                          |  |   |
| g. The proposed action may involve the commercial application of pesticides within 100 feet of potable drinking water or irrigation sources.  | E2h, D2q,<br>E2l, D2c             |  |   |
| h. Other impacts:   |                                   |  |   |
| 5 Impact on Flooding  |                                   |  |   |

| <b>5.</b> Impact on Flooding<br>The proposed action may result in development on lands subject to flooding.<br>(See Part 1. E.2)<br>If "Yes", answer questions a - g. If "No", move on to Section 6. | □ NO                              |  | YES   |
|--|-----------------------------------|--|---|
|  | Relevant<br>Part I<br>Question(s) | No, or<br>small<br>impact<br>may occur | Moderate<br>to large<br>impact may<br>occur |
| a. The proposed action may result in development in a designated floodway.   | E2i                               |  |   |
| b. The proposed action may result in development within a 100 year floodplain.   | E2j                               |  |   |
| c. The proposed action may result in development within a 500 year floodplain.   | E2k                               |  |   |
| d. The proposed action may result in, or require, modification of existing drainage patterns.  | D2b, D2e                          |  |   |
| e. The proposed action may change flood water flows that contribute to flooding.   | D2b, E2i,<br>E2j, E2k             |  |   |
| f. If there is a dam located on the site of the proposed action, is the dam in need of repair, or upgrade?   | E1e                               |  |   |

| g. Other impacts:  |   |  |   |
|--|---|--|---|
| <ul> <li>6. Impacts on Air The proposed action may include a state regulated air emission source. (See Part 1. D.2.f., D.2.h, D.2.g) If "Yes", answer questions a - f. If "No", move on to Section 7. </li> </ul>  | √NO   |  | YES   |
|  | Relevant<br>Part I<br>Question(s)             | No, or<br>small<br>impact<br>may occur | Moderate<br>to large<br>impact may<br>occur |
| <ul> <li>a. If the proposed action requires federal or state air emission permits, the action may also emit one or more greenhouse gases at or above the following levels: <ol> <li>More than 1000 tons/year of carbon dioxide (CO<sub>2</sub>)</li> <li>More than 3.5 tons/year of nitrous oxide (N<sub>2</sub>O)</li> <li>More than 1000 tons/year of carbon equivalent of perfluorocarbons (PFCs)</li> <li>More than 1000 tons/year of sulfur hexafluoride (SF<sub>6</sub>)</li> <li>More than 1000 tons/year of carbon dioxide equivalent of hydrochloroflourocarbons (HFCs) emissions</li> <li>vi. 43 tons/year or more of methane</li> </ol> </li> </ul> | D2g<br>D2g<br>D2g<br>D2g<br>D2g<br>D2g<br>D2h |  |   |
| b. The proposed action may generate 10 tons/year or more of any one designated hazardous air pollutant, or 25 tons/year or more of any combination of such hazardous air pollutants.   | D2g   |  |   |
| c. The proposed action may require a state air registration, or may produce an emissions rate of total contaminants that may exceed 5 lbs. per hour, or may include a heat source capable of producing more than 10 million BTU's per hour.  | D2f, D2g                                      |  |   |
| d. The proposed action may reach 50% of any of the thresholds in "a" through "c", above.   | D2g   |  |   |
| e. The proposed action may result in the combustion or thermal treatment of more than 1 ton of refuse per hour.  | D2s   |  |   |
| f. Other impacts:  |   |  |   |
| <ul> <li><b>Impact on Plants and Animals</b>         The proposed action may result in a loss of flora or fauna. (See Part 1. E.2. r         <i>If "Yes", answer questions a - j. If "No", move on to Section 8.</i> </li> </ul>   | nq.)<br>Relevant<br>Part I<br>Question(s)     | NO<br>No, or<br>small<br>impact        | VES<br>Moderate<br>to large<br>impact may   |
| a. The proposed action may cause reduction in population or loss of individuals of any threatened or endangered species, as listed by New York State or the Federal government, that use the site, or are found on, over, or near the site.  | E2o   | may occur                              |   |

| government, that use the site, or are found on, over, or near the site.  |     |  |

### PRINT FULL FORM

### **Full Environmental Assessment Form**

Part 3 - Evaluation of the Magnitude and Importance of Project Impacts and Determination of Significance

Project : Date :

#### Full Environmental Assessment Form Part 3 - Evaluation of the Magnitude and Importance of Project Impacts and Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

#### **Reasons Supporting This Determination:**

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

See Attachment A - Full Environmental Assessment Form Part 3 Narrative.

| SEQR Status:  | Type 1                      | ✔ Unlisted |        |        |   |  | 9      |
| Identify portions of EAF                                    | completed for this Project: | ✓ Part 1   | Part 2 | Part 3 |   |  | × .    |

Upon review of the information recorded on this EAF, as noted, plus this additional support information and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the Rockland County Sewer District No. 1 as lead agency that: A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued. B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency: There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)). C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued. Name of Action: WWTP Outfall Diffuser and Plant Improvements Project Name of Lead Agency: Rockland County Sewer District No. 1 Name of Responsible Officer in Lead Agency: Michael R. Saber, P.E. Title of Responsible Officer: Executive Director alal 1 Set Signature of Responsible Officer in Lead Agency: Date: Signature of Preparer (if different from Responsible Officer) Date: For Further Information: Contact Person: Michael R. Saber, P.E. ### Full Environmental Assessment Form Part 3 Attachment A

Date: June 22, 2022

#### **Description of Action**

The Rockland County Sewer District No. 1 (RCSD No. 1; "Applicant") owns and operates a New York State Department of Environmental Conservation (NYSDEC) permitted municipal wastewater treatment plant (WWTP) located on NYS Route 340 in Orangeburg, Rockland County, New York. Treated effluent from the RCSD No. 1 WWTP is discharged through an existing outfall (that is jointly used by the Town of Orangetown's WWTP) into the Hudson River located in the Village of Piermont, New York.

The Applicant continually monitors and evaluates the existing wastewater discharge system and proposes to undertake a variety of improvements in order to meet the final requirements that may be included in its NYSDEC State Pollutant Discharge Elimination System (SPDES) permit. It is anticipated that proposed improvement projects may include upgrade to the existing outfall and improvements at the existing WWTP. The existing outfall is located in the bed of the Hudson River south of Ferry Road and Piermont Pier. It is anticipated that the proposed work would include a pipe extension of the outfall towards the river channel, and the addition of several diffusers to increase dilution of the plant effluent discharge into the Hudson River. Improvements at the existing WWTP may include equipment upgrades and replacements, as well as treatment process improvements within the existing footprint of the WWTP and ancillary facilities. As a result, the project is anticipated to improve regional water quality upon the completion of construction.

To support the Applicant's State Environmental Quality Review Act (SEQRA) process, the following summary of predicted environmental impacts is provided. This information builds upon, and is provided to support, Part 2 of the Full Environmental Assessment Form (FEAF) and serves as Part 3 of the FEAF in accordance with SEQRA.

In response to the requirements of SEQRA the Lead Agency (RCSD No. 1) must complete a statement containing rationale in support of their determination of significance (Part 3 of the FEAF). As documented in the FEAF Part 2, there are three questions for which the potential impact has been identified as potentially "moderate to large" and that warrant further explanation which is provided below. Also provided below, in accordance with Part 3, are additional explanations for why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact, in connection with six questions answered in the Part 2 FEAF as "no", or "small impacts" (see below).

#### Questions for which the response indicates that a moderate to large impact may occur:

Question 1: Impact on Land Question 3: Impacts on Surface Water Question 4: Impact on Groundwater

### Additional explanations for why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact:

Question 5: Impact on Flooding Question 7: Impact on Plants and Animals Question 10: Impact on Historic and Archeological Resources Question 12: Impact on Critical Environmental Areas Question 15: Impact on Noise, Odor, and Light Question 16: Impact on Human Health

### 1. Impacts on Land

Proposed action may involve construction on, or physical alteration of, the land surface of the proposed site.

### 1.a. The proposed action may involve construction on land where depth to water table is less than 3 feet.

While the depth to the water table may be three feet or less in some areas at the WWTP project location, the activities associated with the scope of work are not expected to adversely affect the water table. The WWTP improvements will generally be located in previously disturbed areas. Work at the proposed outfall location is in the Hudson River, which is within/below the existing water table. It is anticipated that the project will not adversely affect or lower the water table; however temporary work may be required and will be discussed in the Draft Environmental Impact Statement (DEIS).

### 1.e. The proposed action may involve construction that continues for more than one year or in multiple phases.

The applicant indicates that construction would be accomplished in multiple overlapping phases, occurring over a period in excess of 12 months. The DEIS will provide detailed information regarding the construction timeline and phasing.

### 3. Impacts on Surface Waters

### The proposed action may affect one or more wetlands or other surface water bodies (e.g., streams, rivers, ponds or lakes).

### 3.c. The proposed action may involve dredging more than 100 cubic yards of material from a wetland or water body.

The proposed outfall pipe extension is anticipated to result in temporary disturbance to the riverbed of the Hudson River. Construction-related impacts will be evaluated in the DEIS.

### 3.d. The proposed action may involve construction within or adjoining a freshwater or tidal wetland, or in the bed or banks of any other water body.

A review of the Hudson Valley Natural Resource Mapper available through the NYSDEC indicates that tidal wetlands are not located at the precise location of the proposed outfall pipe extension; however, several tidal wetlands are located near the proposed location on Piermont Pier and southwest of the Pier. The locations of these tidal wetlands are also riparian buffer areas. Additionally, potential proposed work at the existing WWTP could be located adjacent to Sparkill Creek, a NYSDEC class C(T) stream. The DEIS will assess potential impacts to wetland and water resources.

## 3.e. The proposed action may create turbidity in a waterbody, either from upland erosion, runoff or by disturbing bottom sediments.

The proposed outfall pipe extension may result in a temporary increase in water turbidity due to disturbance of bottom sediments within the Hudson River. As a result, the impacts on turbidity will be minimal, and mitigation, if required, will be determined through further analysis in the DEIS.

### 3.g. The proposed action may include construction of one or more outfall(s) for discharge of wastewater to surface water(s).

The proposed action involves upgrades to an existing wastewater outfall pipe located in the bed of the Hudson River. It is anticipated that the proposed project will not cause increased discharge of wastewater into the Hudson River above current volumes. As a result, the project is anticipated to improve regional water quality upon the completion of construction. The DEIS will further assess the magnitude and importance of these impacts.

### 3.i. The proposed action may affect the water quality of any water bodies within or downstream of the site of the proposed action.

The proposed action involves upgrades to an existing wastewater outfall pipe located in the bed of the Hudson River. It is anticipated that the proposed project will not cause increased discharge of wastewater into the Hudson River above current volumes. As a result, the project is anticipated to improve regional water quality upon the completion of construction. The DEIS will further assess the magnitude and importance of these impacts.

### 4. Impacts on Groundwater

### The proposed action may result in new or additional use of ground water, or may have the potential to introduce contaminants to ground water or an aquifer.

### 4.d. The proposed action may include or require wastewater discharged to groundwater.

The proposed action involves upgrades to an existing wastewater outfall in the Hudson River. The Hudson River waterway shares hydrologic connections to the groundwater and aquifers along its banks. The DEIS will further assess the magnitude and importance of these impacts.

### 5. Impacts on Flooding

The proposed action may result in development on lands subject to flooding.

### 5.b. The proposed action may result in development within a 100 year floodplain.

A review of the Federal Emergency Management Agency's (FEMA) Flood Insurance Rate Maps (FIRM) indicates that the WWTP project area, and the existing outfall site, occur partially or within the 1% Annual Chance floodplain associated with Sparkill Creek and the Hudson River, respectively. It is anticipated that the proposed project will not be a significant obstruction or reduce the area of the floodplain in manner that will have a significant impact. As a result, the impacts on flooding will be minimal, and mitigation, if required, will be determined through further analysis in the DEIS.

### 5.c. The proposed action may result in development within a 500 year floodplain.

A review of the Federal Emergency Management Agency's (FEMA) Flood Insurance Rate Maps (FIRM) indicates that the WWTP project area, and the existing outfall site occur partially or within the 5% Annual Chance floodplain associated with Sparkill Creek and the Hudson River, respectively. It is anticipated that the proposed project will not be a significant obstruction or reduce the area of the floodplain in manner that will have a significant impact. As a result, the impacts on flooding will be minimal, and mitigation, if required, will be determined through further analysis in the DEIS.

### 7. Impacts on Plants and Animals

The proposed action may result in a loss of flora or fauna.

## 7.b. The proposed action may result in a reduction or degradation of any habitat used by any rare, threatened or endangered species, as listed by New York State or the federal government.

Question E2o on Part 1 of the FEAF indicates that the site of the proposed outfall upgrades falls within the Hudson River which includes habitat for species of plants, fish, and wildlife. The DEIS will further assess the magnitude and importance of potential impacts to threatened and endangered species, and significant coastal fish and wildlife habitats.

### 10. Impacts on Historic and Archeological Resources

The proposed action may occur in or adjacent to a historic or archaeological resource.

# 10b. The proposed action may occur wholly or partially within, or substantially contiguous to, an area designated as sensitive for archaeological sites on the NY State Historic Preservation Office (SHPO) archaeological site inventory.

Question E3f on Part 1 of the FEAF indicates that the project site, or any portion of it, is located adjacent to an area designated as sensitive for archaeological sites on the NY State Historic Preservation Office (SHPO) archaeological site inventory. The project will be reviewed to determine if the proposed project will cause an adverse impact to historic or cultural resources within the project area in accordance with the procedures outlined in 6 NYCRR Part 617 SEQR, Section 14.09 of the New York State Parks, Recreation and Historic Preservation law (1980), and/or Section 106 of the National Historic Preservation Act (NHPA, 1966). All NYSHPO findings, correspondence, and mitigation actions, if required, will be incorporated into the DEIS.

### 12. Impacts on Critical Environmental Areas

### The proposed action may be located within or adjacent to a Critical Environmental Area (CEA).

Question E3d on Part 1 of the FEAF indicates that the proposed outfall project is adjacent to two state- listed Critical Environmental Areas (CEA). The Sparkill Creek and Piermont Pier CEAs were designated by the Village of Piermont on April 24, 1985 with the protection of open space and aesthetic beauty as the basis for designation. The DEIS will provide further evaluation and analysis to determine if there are any necessary mitigation efforts required to reduce impacts to the CEAs.

### 15. Impact on Noise, Odor, and Light

### The proposed action may result in an increase in noise, odors, or outdoor lighting.

As noted in Question D2m on Part 1 of the FEAF, construction activities may result in temporary increases of nearby sound levels due to the intermittent use of heavy machinery during construction of the proposed project. Construction noise can vary widely depending on the phase of construction (*e.g.*, demolition, clearing

and excavations, foundation, steel and concrete erection, etc.) and the specific task equipment and methods used. The DEIS will assess the magnitude and importance of these impacts.

The proposed project does not require the lighting of new site elements. Lighting could be utilized temporarily during construction and designed to maintain site safety and security while avoiding off-site light spill-over onto neighboring properties. The DEIS will assess the magnitude and importance of these impacts.

#### 16. Impact on Human Health

### The proposed action may have an impact on human health from exposure to new or existing sources of contaminants.

### 16b. The site of the proposed action is currently undergoing remediation.

Question E1h on Part 1 of the FEAF indicates that the site of the proposed action is currently undergoing remediation which corresponds to the ongoing PCB remediation within the Hudson River (DEC ID number 546031). This will be further evaluated in the DEIS.

### 16c. There is a completed emergency spill remediation, or a completed environmental site remediation on, or adjacent to, the site of the proposed action.

Question E1h on Part 1 of the FEAF indicates that the site of the proposed action is within 2000 feet of sites listed on the NYSDEC Environmental Site Remediation database. A review of public data as documented in Part 1 of the FEAF indicates the potential for the following DEC Identified Sites to be located near the WWTP or outfall locations: 344034 (Piermont Papermills; site has been properly closed; requires continued site management), 546031 (Hudson River PCB Sediments ; ongoing remediation), V00579 (Former Orangeburg Pipe - Mfg - Lowe's Site; Completed), V00343 (Former Orangeburg Pipe Landfill; No further action at this time), and C344073 (Orangeburg Commons; Completed). According to the NYSDEC Environmental Site Remediation Database, V00579 (Former Orangeburg Pipe - Mfg - Lowe's Site) and C344073 (Orangeburg Commons) have completed remediation efforts. Potential impacts related to the nearby locations will be further evaluated in the DEIS.

### **Conclusion**

Upon review of the information recorded in this FEAF and considering both the magnitude and importance of each identified potential impact, additional information is required to determine if significant adverse impacts on the environment will result from the project, and, therefore, an environmental impact statement will be prepared. As such, a determination of significance (Positive Declaration) may be undertaken by the Lead Agency.

Unan.

### RESOLUTION NO. 37 OF 2022 ISSUING A POSITIVE DECLARATION, AUTHORIZING SCOPING SESSION, AND EIS FOR THE WASTEWATER TREATMENT PLANT OUTFALL DIFFUSER AND PLANT IMPROVEMENTS PROJECT

WHEREAS, the Rockland County Sewer District No. 1 (hereinafter "RCSD") proposes to undertake a variety of improvements in order to meet final requirements that may be included in its New York State Department of Environmental Conservation, State Pollutant Discharge Elimination System Permit, and,

WHEREAS, proposed improvements include upgrades to an existing outfall located in the bed of the Hudson River south of Ferry Road and Piermont Pier (which is jointly used by RCSD and the Town of Orangetown's wastewater treatment plants), including a pipe extension of the outfall towards the river channel, and the addition of several diffusers to increase dilution of effluent discharge into the Hudson River, as well as equipment upgrades and replacements, and treatment process improvements within the existing footprint of the wastewater treatment plant and ancillary facilities, located on NYS Route 340 in Orangeburg, Rockland County, New York, all of which will improve water quality (the "Project"), and,

**WHEREAS**, the Project is subject to the State Environmental Quality Review Act, 6 NYCRR Part 617 ("SEQRA"), which requires activities like the Project, that are proposed by a unit of local government, like the RCSD, to conduct an environmental impact assessment to identify and mitigate the significant environmental impacts of the proposed Project, and,

WHEREAS, Resolution No. 24 of 2022 authorized RCSD to designate itself as lead agency under SEQRA for the Project, and,

WHEREAS, RCSD notified involved parties of its intent to serve as lead agency for the Project on May 18, 2022, and,

**WHEREAS**, RCSD was established as lead agency on June 18, 2022, having not received any objection from any involved party during the 30 calendar days following the May 18, 2022 notification to involved parties, and,

WHEREAS, under SEQRA, within 20 days of establishing RCSD as lead agency, the lead agency must make a determination as to whether the Project may or will not have a significant adverse impact on the environment, and,

WHEREAS, RCSD and its consultants have determined that the Project may result in a significant adverse impact (a "Positive Declaration"), and therefore, will require preparation of an environmental impact statement (a "EIS"), and,

WHEREAS, pursuant to SEQRA, RCSD must prepare and file a notice of the Positive Declaration, and,

WHEREAS, after filing a notice of the Positive Declaration, RCSD must begin the scoping process under SEQRA in order to identify the issues that will be addressed in a draft EIS, and must provide a reasonable opportunity for the public and other interested agencies to participate in the scoping process, which may include meetings, exchanges of written material or other methods, now, therefore, be it,

**RESOLVED**, that the Rockland County Board of Sewer Commissioners hereby approves RCSD's intent to issue a Positive Declaration, and authorizes the Executive Director to take any and all necessary or appropriate actions related thereto, including but not limited to the issuance and publication of all required notices, and, be it,

**FURTHER RESOLVED**, that the Executive Director is hereby authorized and directed to take any and all necessary or appropriate actions to facilitate scoping sessions and the development of the EIS, including but not limited to, providing a reasonable opportunity for the public and other interested agencies to participate in the scoping process, by way of meetings, exchanges of written material or other methods, and, be it,

**STILL FURTHER RESOLVED**, that the Executive Director is hereby authorized and directed to take such steps as are necessary to carry out the intent of this resolution.
