

Polio can spread in the water!

Help keep the water safe

Maintain minimum disinfectant levels

(If the instructions on the product label differ from those below, follow the product label)

Pools: 1.0 ppm free chlorine

If pool using cyanuric acid, “dichlor”, or “trichlor”: 2.0 ppm free chlorine

Spas/Hot tubs: 3.0 ppm free chlorine or 4.0 ppm bromine

Keep pH at 7.2–7.8

Check disinfection levels and pH before use and more often on hot days or when more people are in the water
