Protect Your Child, It is Safe and Easy

Information on Early Childhood Immunizations

Pwoteje Timoun Ou an, Li San Danje epi li Fasil

Enfòmasyon sou Vaksen pou Timoun Piti

Get the Facts: / Jwenn Verite yo:

Immunizations Are Tested & Safe

Before immunization is ever given, extensive testing is done to make sure they are safe. They are given daily to millions of children.

Yo Teste Vaksen yo epi yo San Danje

Anvan yo bay chak vaksen, yo fè tès apwofondi sou yo pou yo asire yo yo san danje. Yo bay dè milyon timoun yo chak jou.

Immunizations Protect Against Serious Diseases

Polio can cause permanent paralysis, pertussis causes brain damage, and mumps can lead to infertility later in life. Even Measles can kill in some cases. These immunizations are very important for your child's health.

Vaksen yo pwoteje kont Maladi Grav

Polyo lakoz paralizi pèmanan, Koklich lakoz lezyon nan sèvo epi malmouton yo ka lakoz moun paka fè pitit pi devan. Menm lawoujòl ka touye moun nan kèk ka. Vaksen sa yo, enpòtan anpil pou sante timoun ou an.

Getting Multiple Vaccines At The Same Visit Is Proven To Be Safe

These immunizations make sure your baby is protected sooner rather than later. Delaying vaccines could be harmful and will not reduce side effects.

Yo pwouve Bay Plizyè Vaksen Pandan yon menm vizit San Danje

Vaksen sa yo asire yo tibebe ou a pwoteje pi bonè posib. Retade vaksen yo ka pa bon epi sa p ap redui efè segoondè yo.

Schedule of Early Childhood Immunizations

If your child misses the best time for immunizations on this chart, ask your doctor about getting your child caught up.

Kalandriye Vaksen pou Timoun Piti

Si timoun ou an manke pi bon moman pou l te pran vaksen an, mande doktè ou a pou li ratrape l.
